THEATER

Since I was little I always wanted to be an actress, my passion for this art started early. At the age of 10 I did a commercial on television. At 12 I started the school theater, had dance and presentations, very cool .. I soon stayed 6 months of a course more advanced theater, and I made the jokes, activities and reflections myself I became more and more in love with this world , when I finished this course, I received a certificate and after that I only followed the theater of the school.

Over time, I was growing and new options were emerging, and I started to get interested in journalism and publicity, and began to wonder if the theater was really what I wanted for my life. It was then that I wanted to start a professional theater course.

I wanted to be sure about what I wanted. At the age of 14, I entered the course, and in the first class I was sure that my passion for theater was more alive than ever.

The professional course in which I entered, is well known and praised by many people. I started on the beginner, which was 6 months of learning and new experiences. Every time I went to class, I smiled and entered with all my positive energy, and gave myself totally to everything that was there.

What I felt inside me was something surreal, overflowing, a new and totally hot sensation! It was a lot of joy that I felt in doing this stage of the course.

I met people from everywhere, from all colors, from all personalities, in every sense, different people than we are accustomed to see in our day to day. I have made many good friends and I want to take them for the rest of my life.

Today I feel at home going there, it's like a haven from everything, it's so good to know that you're going to a place where no one will look at you crooked, no one will judge you by who you are, people will receive you They accept you, and there is no feeling better than being treated well,

because no matter what race, color, hair, clothes, whether or not you have something, it does not matter, and then you can be whatever you want in there without fear of anything .

Today I'm in a professional module and I'm graduating soon, so I take my DRT to start doing tests on television, and I also want to continue doing theater, the stage is everything for me, there I cried, I screamed, I smiled, I felt and I loved it. And I also want to graduate in performing arts in college.

I've heard many nasty things, people trying to knock me down, saying I would have no future. It is very sad to see that there are these people in the world, who like to leave the other down, but I think there will always be people like that. But I never bothered with it, it's very indifferent to me! I discard negative people. My mother's dream is that I would be a dentist, and no, I would not be, I admire the profession, but it's not what I like.

I love the feeling of studying and understanding a character I'm doing, it's very difficult, not only read a script and decorate, has to incorporate the character, act and think like him, understand every circumstance, it's so magical when you perform that.

A teacher told me: be present here in body and soul. And I'll take this forever, it's a phrase that I'll never forget. It is indescribable the sensations that I feel doing what I like, I would like very much to take what I have already learned for people, this art and this intensity.

Today at age 16, I'm sure of what I want for my life. I'm a dreamer and I believe a lot in dreams, and the tip I have is that if you have a dream, run after it, do not give up, try one, two, three times and how many you need. There will always be negative people, who will try to put you down, and say that you are not capable, but eliminate these people from your life and stay with the people who encourage you every day to be someone better.

Do not give up on your dreams, be strong, persist, strive and most important, believe in yourself.
