

The second war of straws

In september 2020 a Toddy crisis begins after the third world war making socialist republic of toddys if it restores again.

With the dictator Toddynho Lennin this republic became one of the gratest military power of the world that scares the United Stades of Nescau very much and all nescaline America,then the world was divided between Toddy and Nescau.

In the begging nothing much happened however the USST was suspecting the USN to take armaments made of straws to Turquia and Italia,because straws missiles are the most powerful because they couples larger chocolate fontair.So it also USST took missiles of straws to Cuba,this generating the crisis of cuban straws.

In that time the world was stopped at time or another much could happen, at that time the USN planned to invade Cuba quickly so they did not have time to play missels in USN.

At that time the USN nothing more to do if it did not take away the missile the Turquia and Italy.

shortly after the withdrawal of missiles the dictator Lennin have died and the new dictator Toddy Stalin it was who stayed in power, and leaving the toddism very strong it began to spread to all Chocásia, then several countries were divided between in north and south as the colonies and Vietnam, there arose several minor wars in the Chocásia being controlled to USN and USST.

With the new power in USST it has been industrializing a lot, making the first chocolate to go to space is a Toddy, generating the famous phrase "the earth is brown", but with the Nescaw Kenedy in the power of the USN he gave a historical speech saying that he was going to put Nescaw on the moon even in that decade, but it was very expensive to try to build a rocket canister to go to the moon, so Kenedy asked USSR to make a partnership for the two to reach the moon, Stalin until he agreed but let wait a little longer when he saw that it was necessary and went to sign the agreement, he received the news that Kenedy had died.

so he left the deal aside as he did not trust stallin's deputy, while the USSR was already with two chocolate probes in space, the USN paid the biggest monkey of the life of a Nescau because at the time of the launch the straw you inves to climb, there was an error that the straw exploded.

the war was already finished in the hands of the Nescaus, but in the changes of government in the USST she began to enter a crisis again then with all this she began to increase the value of taxes, with that began to arise several separatist movements by USST as in current Toddyquistan and current toddylonia.

And with that the country had to put aside the space race and focus on the government itself, meanwhile the USN took advantage and sent the apollo 9 10 and the famous apollo 11 to orbit the moon in only 2 months and finally in March 2026 the chocolate finally put his box on the moon generating the other famous phrase "A small step for a chocolate, a great leap into the chocolate".

With the victory of the USN in the friu chocolate war but the physical war was beginning, in the USST the stallin dictator had also died then came the dreaded toddysky dictator and incorporated with defeat he gathered more than 2 million chocolates with 13.5 caliber straws for the war knowing the news through the South Koreans the USN began to protect their borders not to undergo an invasion however they arrived through the Mexican and overturned the wall of the border with the EUN and thus began officially the war of straws initially the target was the capital but they discovered where the EUN hid the atomic bomb which was in Nevada then generated the race of tension because if the EUN had the bomb before the USST they would win but if they arrived first the victory would be the USST at that time the USST were in Arizona walking constantly without stop because it was a moment of life and death, but to the joy of the EUN they managed to launch the bomb in são ptersburgo when the USSR were within 30 kilometers of snowfall but with the bomb that only left the angriest toddys then began to destroy,

everything that lay ahead leaving a whole state in complete chaos but they were immobilized but it was already late and a lot of nescaus and and toddys died with this war and the end of the USST came and went to be the Russia and left both countries with a huge crisis but both in 2029 made up an economic bloc after this war to be able to recover and still succeed
