

Student's Writings

About the Ebook

This e-book is about the writings from ribeirinhos students about different themes and ideas. All produced in English classes and homeworks.

Jatuarana Community and my school

Eric Oliveira Pereira

This story will be about my community called Jatuarana and the school where I study. The community in which I live is very harmonious and has a very good presence of nature, people here live more from fishing and agriculture because there are not many work options here. Good thing you have a school to help educate young people, of course it's not there, but it helps us a lot. Inside the school there are many stories that scare the children like the blonde in the bathroom, but of course not one of them is true, they are just to scare the children. I thank God that there is not even violence here, within the school everyone gets along from teachers to students.

CHAPTER ONE

It happened to me

Salles Rocha

When I was six years old in 2010, I was running on the beach, alone by the river when I stepped on a stingray spur, cried a lot. So my mom listened and ran to see what it was, she caught me and put her arm and took me home. Arriving home, he put a cloth on my face and managed to remove that spur. It hurt so much, I almost fainted from the pain. I went to the hospital, spent three weeks recovering from that hole. When I got home, my brothers who were very worried about me gave me a lot of hugs; my foot was all bandaged. At night they surprised me, I was thrilled with everything they prepared just for me. I thanked my mother with a tight hug and my brothers with a kiss on the cheek.

Julio de Araújo

One day I was indoors because it was raining so much, I couldn't leave the house almost all day and went to sleep. When I woke up my mother told me to go get the animals that were out of the sty, so I got the animals, but a duck was missing. I tried to catch the duck, but when I went to catch it, it falls on an iron tank because the ground was smooth. It made a very ugly cut on my arm that almost picks up a vein; My father took my arm, washed it and put a cloth on it. The other day, I was already messing up and then I hit again because I was playing in the hammock when my dad saw me, fought me and told me to quiet down.

CHAPTER TWO

Canal Vacation

Alexandre Vieira Junior

The canal holidays are really cool, especially now that summer is here and the sun is very hot. We go there to take a shower, but only when it dries because it's just a pond. The water is very cold, many people go there to enjoy, it is like a day of leisure. The best place is the "grandpa's stick" a ravine that is deep below; I can give mortal. This year I think the drought is going to be big, and it won't be long before the canal comes out for all of us to take a shower and enjoy.

Mylle Caroline da Cunha

Last November, there was a time when Hanielly and Jean invented going to the canal, we hardly knew we were on a bad day. When we got to the canal it was still fine and we met some friends there and had fun. After a while, a rain started to form so we decided to leave, as it was very dry the river had to walk a long time to reach the canoe. On the way it started to rain, it was very strong and lightning so we spent a little time in a resident's house until the rain passed. When it passed a little more we left, halfway through the gasoline! Our luck was that a friend of ours showed up and helped us. When we landed, Hanielly and I got stuck in the mud, only after we got home, we were dirty, wet, muddy, and my cell phone and Hanielly's towel were all dirty.

Eric Pereira

Well I live in a community in the interior of Manaus, being a small community there are no streets and no cars to take us to school, so the only means of transport is through the water which in our case is a speedboat. But my anger about this is the malfunctioning of our transportation that goes too long without making a route which makes it difficult for students to go to school causing them to miss school. The few students who go to school when they do not have school transportation have to go on their own driving causing them to be life-threatening, because to get to school they have to come by the Amazon River. And God forbid these people are flooded in a storm that is a little constant around here, they may even drown and this is my biggest revolt so far.

Maria Eduarda Cunha

A PIRANHA'S REVOLT

One day my cousins and I were jumping in the water in front of my house, it was a Tuesday at 5 pm. My cousins were on the raft and I in the water got bit by a piranha four times! My uncle put lemon on my finger, so we went back to water, but the worst thing is being bitten by piranha.
