

Pugs are dogs  
Pugs are  
descendent from  
ancient China.  
The "short  
mouthed dogs",  
are found on  
texts from 700

The pug is a toy dog with a wrinkly, short-muzzled face, and curled tail. The breed has a fine, glossy coat that comes in a variety of colors, and a compact square body with well-developed muscle.

They can suffer from a variety of health issues, including overheating, obesity, and over cuteness!

Friendly and loving, schnauzers become part of their families and get along with children if raised and socialized the right way. They are protective, energetic and will alert members of the household if sees danger. The schnauzer, ever alert, makes an excellent watchdog, although its watchful nature can lead to persistent barking

A schnauzer is a dog breed that originated in Germany in the 15th and 16th centuries. The term comes from the German word for "mustache", because of the dog's distinctively bearded snout.

Some authorities, such as Encyclopædia Britannica, also claim that the name is derived from the word's secondary meaning of "moustache". Although the schnauzer is considered a terrier-type dog, they do not have the typical terrier temperament.
