SAMOIEDA

The Samoyed is a very primitive breed of dog, which has evolved very little over the past 5000 years (the period in period in which they arose most breeds known nowadays).

from:Google Images

Considered most beautiful breed of all dogs, is possibly the sweetest of all. It is considered the most domesticated animals by man.

Spanning the globe:

The "discoverer" of the breed was the Norwegian Nansen Fridjof that in 1870 he was impressed with the strength and versatility of the Samoyed and used as a draft dog in their holdings. Many other explorers also used dogs Samoyeds on his travels to the poles these dogs were brought from Siberia, which made possible the conquest of the poles by explorers like Roald Amundsen and American Robert Peary. The first men to set foot at the South Pole and the North Pole respectively. The first copies were imported into Europe in 1889, were brought to Britain by British zoologist Ernest Kilburn Scott who, after living among the tribe of Samoyeds for three months returned home carrying a male puppy named "Sabarka" later he imported more copies, a female named "Whitey Petchora" and another male named "Musti".

BullDog

The bulldog is a breed originated in England. Its origin is not quite right, though know that until the mid-eighteenth century their copies, taller and agile, they were used in combat against bulls. When these clashes were banned, the Bulldog seen today as a companion dog, was saved by faithful creators. The reason for this assertion is that interference in crosses that generated the current diminutive size, prevented him playing by himself. An example of this is her nose: facing up, hinders the cooling effect and leads to overheating the animal, besides restricting their energy to mate. Its said perfect physical fighter also not helped with the dogs. The females were not successful in natural births since its crooked legs (excellent to dribble the opponents), prevented his bones dilate enough to provide for the passage of the puppies. His personality is described as playful and affectionate, despite the brave face.

Persona:

Care and expressive. They have a special fondness for children. It's a race strictly for companionship and barks very little.

Longevity:

About 10 years.

Fonte:GoogleImages
