

# Super Dogs

Por: Ana Júlia Naves & Felipe

The Golden Retriever breed dogs were historically developed for hunting activity, having accepted from the beginning of 1852 in Britain. With the union of several breeds developed over the years came to Golden of today.

The Golden Retriever is a dog that exudes energy, so it's crucial the owner of the dog take you for day trips such as hiking. So much energy can be burned with several games, which as we have said Golden loves. Besides liking to have fun galore, the Golden Retriever dog breed is very intelligent and easy to assimilate commands quickly, which makes it easier for dressage.

Despite appearing to be gentle and meek, the Golden Retriever have a great strength is very agile and smart. this class can also provide a more clear coat,

#### Characteristics of the breed

This breed is characterized by its large size and the smooth and golden coat this can also provide a more clear coat, the cream. Its height varies between 50cm and 63cm and its weight can reach 34 kg. Kind and calm temperament, is super playful. It also is always willing to exercise physical activities. Dogs are obedient and faithful. By having a heightened sense of smell is used for drug sniffing dog and how to guide.

#### Breed Standard

The Golden Retriever is an active dog and must exercise often, but it is still a great company to its owner, provided it is prepared for the exercise.

It's a dog that loves to work and please the owner. They are easy to train and be sweet and gentle caring for children are great, almost like a nanny. They are also good dogs to sniff out drugs, rescue survivors, guide the blind and other disabled people. Besides all this therapy also helps in recovery of hospital patients, especially children and the elderly.
