

A close-up portrait of a fluffy golden retriever puppy. The puppy has light-colored, wavy fur and large, dark, expressive eyes. It is wearing a black bow tie around its neck. In its mouth, it holds a vibrant red rose with green leaves and a stem. The background is a warm, out-of-focus gradient of orange and brown tones.

THE CUTEST DOGS IN
THE WORLD

Por: LETÍCIA E LUIZA

As everyone knows, dogs are man's best friends. They are companions, loyal friends and inseparable. All dogs have their qualities and peculiarities, but in my opinion, there are two dogs that are the cutest in the world. I'll tell you a little more about them:

PUGS

The Pug probably originated in ancient China. They are known as "Short Mouthed dogs" and were described in writings from about 700 BC. Because of the short hair, the forehead wrinkles of the Pugs were more visible, and the Chinese always sought wrinkles in certain patterns similar to the symbols of the Chinese alphabet. The symbol considered more

important, was the three wrinkles, that together representing the word "prince" in Chinese.

At the end of the sixteenth century, the China began trading with European countries, and these

little dogs were taken to the Occident as gifts. And so the Pug started to get popular in Europe. Pug is a very docile breed, then it is a great dog for kids.

Quite faithful to its owner, is an inseparable friend, accompanying you everywhere, even if he is not invited. And when the Pug barks, seems to be snoring, but don't worry, they don't bark much. They are very smart and playful, love a good ball. And if by chance you have other pets, stay calm, the Pug gets along very well with other animals. He is a very affectionate dog, loves a lap. They are very clean and loves old people.

Pugs lose a lot of hair, so if you are allergic, it's not a good option. They also don't have much physical strength, ideal for people who lives in apartments.

The Pugs are sensitive dogs and need special care. They should be fed with quality food. They also have a tendency to obesity, so don't give too much food and don't give candies or fried foods. He needs lots of water,

so always leave a bowl of water next to him.

YORKSHIRE TERRIER

The Yorkshire was probably created from the crossing of several Terriers in the area of Yorkshire, England. The Yorkies were seen on the laps of rich ladies of England. In 1880, the Yorkshires arrived in the U.S.A. They made success, and the Yorkshire Terrier is currently one of the most luxurious races that exist.

The Yorkshire Terrier loves adventure, is always busy, has a strong personality, is stubborn and can be aggressive with strange dogs and other small

The Yorkshire barks a lot, but with training, he easily lose that annoying habit.

They are very smart and love to get the attention of the family. They are a great company for those who lives alone, have more than enough energy to play , get along with other dogs and cats (if accustomed early).

The Yorkshires, as well as all other dogs, have to be fed with good food. No candies and fried food!!

They have much hair, so they need to be brushed every day to prevent your hair from falling.

The Yorkishire also has depressive tendencies, so don't leave him too long alone.

And if you want a pet, but is afraid of losing him someday, don't worry, the Yorkshire will stay a long time next to you! He lives approximately 12 to 15 years, are many years enjoying the pet, right?!

Now that you know a little more about each dog, you can adopt one for you! What do you think?!

They give us unconditional love and affection, and deserve to be loved too.

But if you already have a little dog, give him lots of love, he will be your best friend forever, and will never ask for anything in return.
